Subject: Re: Submittals for Navigational Dredging Part A _ Email 1

Paul and all - since the upper harbor contractor (Tripp Marine) has deployed oil booms around the perimeter of the CAD cell, wouldn't it make sense to leave these booms deployed during the lower harbor CAD cell placements? Perhaps shift the demobilization of the booms from Tripp to the lower harbor contractor if Tripp wants to demob prior to the lower harbor work being completed (the same cost regardless of who removes the booms).

Dave D.
